

The New Russian AK-103

Completely Converted By

As Seen on the Discovery Channel's **Sons of Guns** TV Show

Whether buying this as a collectable, investment, or tactical rifle, why settle for anything less than the best? This AK-103 is a rifle for the truly discerning customer who will accept nothing else. Don't be disappointed with reassembled surplus rifles. Step up to the world renowned quality of the Russian Izmash made AK from Izhevsk Russia – the same plant that makes AK's for the Russian Military. This gun is built at the same plant, by the same machines, and under the watchful eye of Mikhail Kalashnikov himself for the last 60 years. This is truly the absolutely best AK money can buy! **Supplies on this EXTREMELY rare and desirable rifle are limited and will not last long, especially since the Izmash plant has declared bankruptcy and all exports have stopped.** We have worked hard to source these guns and have bought almost everything available on the market. Partnering with Red Jacket Firearms, we are having the imported versions converted to the complete AK-103 specs.

FEATURES:

- Receiver and action made from 100% brand new parts, not assembled from surplus kits that have been shot countless times, cut up, reassembled and relabeled like most other companies.
- New AK-74 style brake is 60% more efficient at compensation and 90% more efficient at flash hiding than the older slant brake design.
- Hand fit and finished, one at a time, NOT churned out on an assembly line like the rest – superior fit and finish!
- Black polymer furniture which is lighter than wood and doesn't splinter, dent, or crack. Poly furniture doesn't swell or shrink with heat or water [putting pressure on the barrel and effecting aim] like wood does; nor is it affected by cleaning chemicals. Thanks to the polished and hardened stainless steel heat shields inside the hand guards, this furniture doesn't get as hot and cools down quicker than the older wooden hand guards. A truly superior design!
- Solid machined, chrome plated, one-piece gas piston – not a plain steel two piece cast design like others use.
- Forged and chromed lined 90 degree gas block, completely maintenance free and 20% more efficient than the older 45 degree design.
- Steyr Technology cold hammer forged chrome lined barrel – the best there is!
- Completely heat treated Russian receiver – not spot treated like the others.
- Forged bolt and bolt carrier – not cast.
- Correct smooth action cover.
- Threaded muzzle.
- Bayonet lug.
- Stamped with the Red Jacket Firearms shield, to prove you have the absolute best.

ALL backed up by the manufacturer's UNCONDITIONAL, STEM TO STERN, NO QUESTIONS ASKED **LIFETIME WARRANTY** through **Red Jacket Firearms!** Very few companies offer a lifetime warranty, and the few that do come with all kinds of fine print that limit it to workmanship only. Our guns have no such limitations. Their warranty is 100% ironclad unconditional. How can they offer this kind of warranty? Simple. Build a better product that they know will be very unlikely to need it.
